

paint paper & doyleys

Paint Paper Picture Frame Doyley

Difficulty - Medium. Some adult assistance required.

INSTRUCTIONS

1. Cut out the centre of your white doyley.
2. Place the outside of your white doyley on litho paper (do this so you don't make a mess on the table) and tear strips of paint paper and place around the white doyley. You can use as many or a little colours as you like.
3. Use your spray bottle and spray a light mist of water over the paint paper and white doyley. The excess run off with will go on your litho paper. Once you have sprayed the paint paper let sit for a little while and then remove the paint paper off your white doyley.
4. Your white doyley will now have a coloured effect over it.
5. Now with your coloured doyley you can place on top of an image or glue to a colour of cover paper of your choice and draw an image inside. For an even greater effect cut the cover paper down to the size of the doyley.

ACTIVITY

Picture frame from paint paper & doyleys
