

rainbowTM

Caterpillar

Difficulty - Medium. Some adult assistance required.

ACTIVITY

Create a 3D Caterpillar model.

SUPPLIES

Tools:

Scissors
Glue
Staples (optional)

Product:

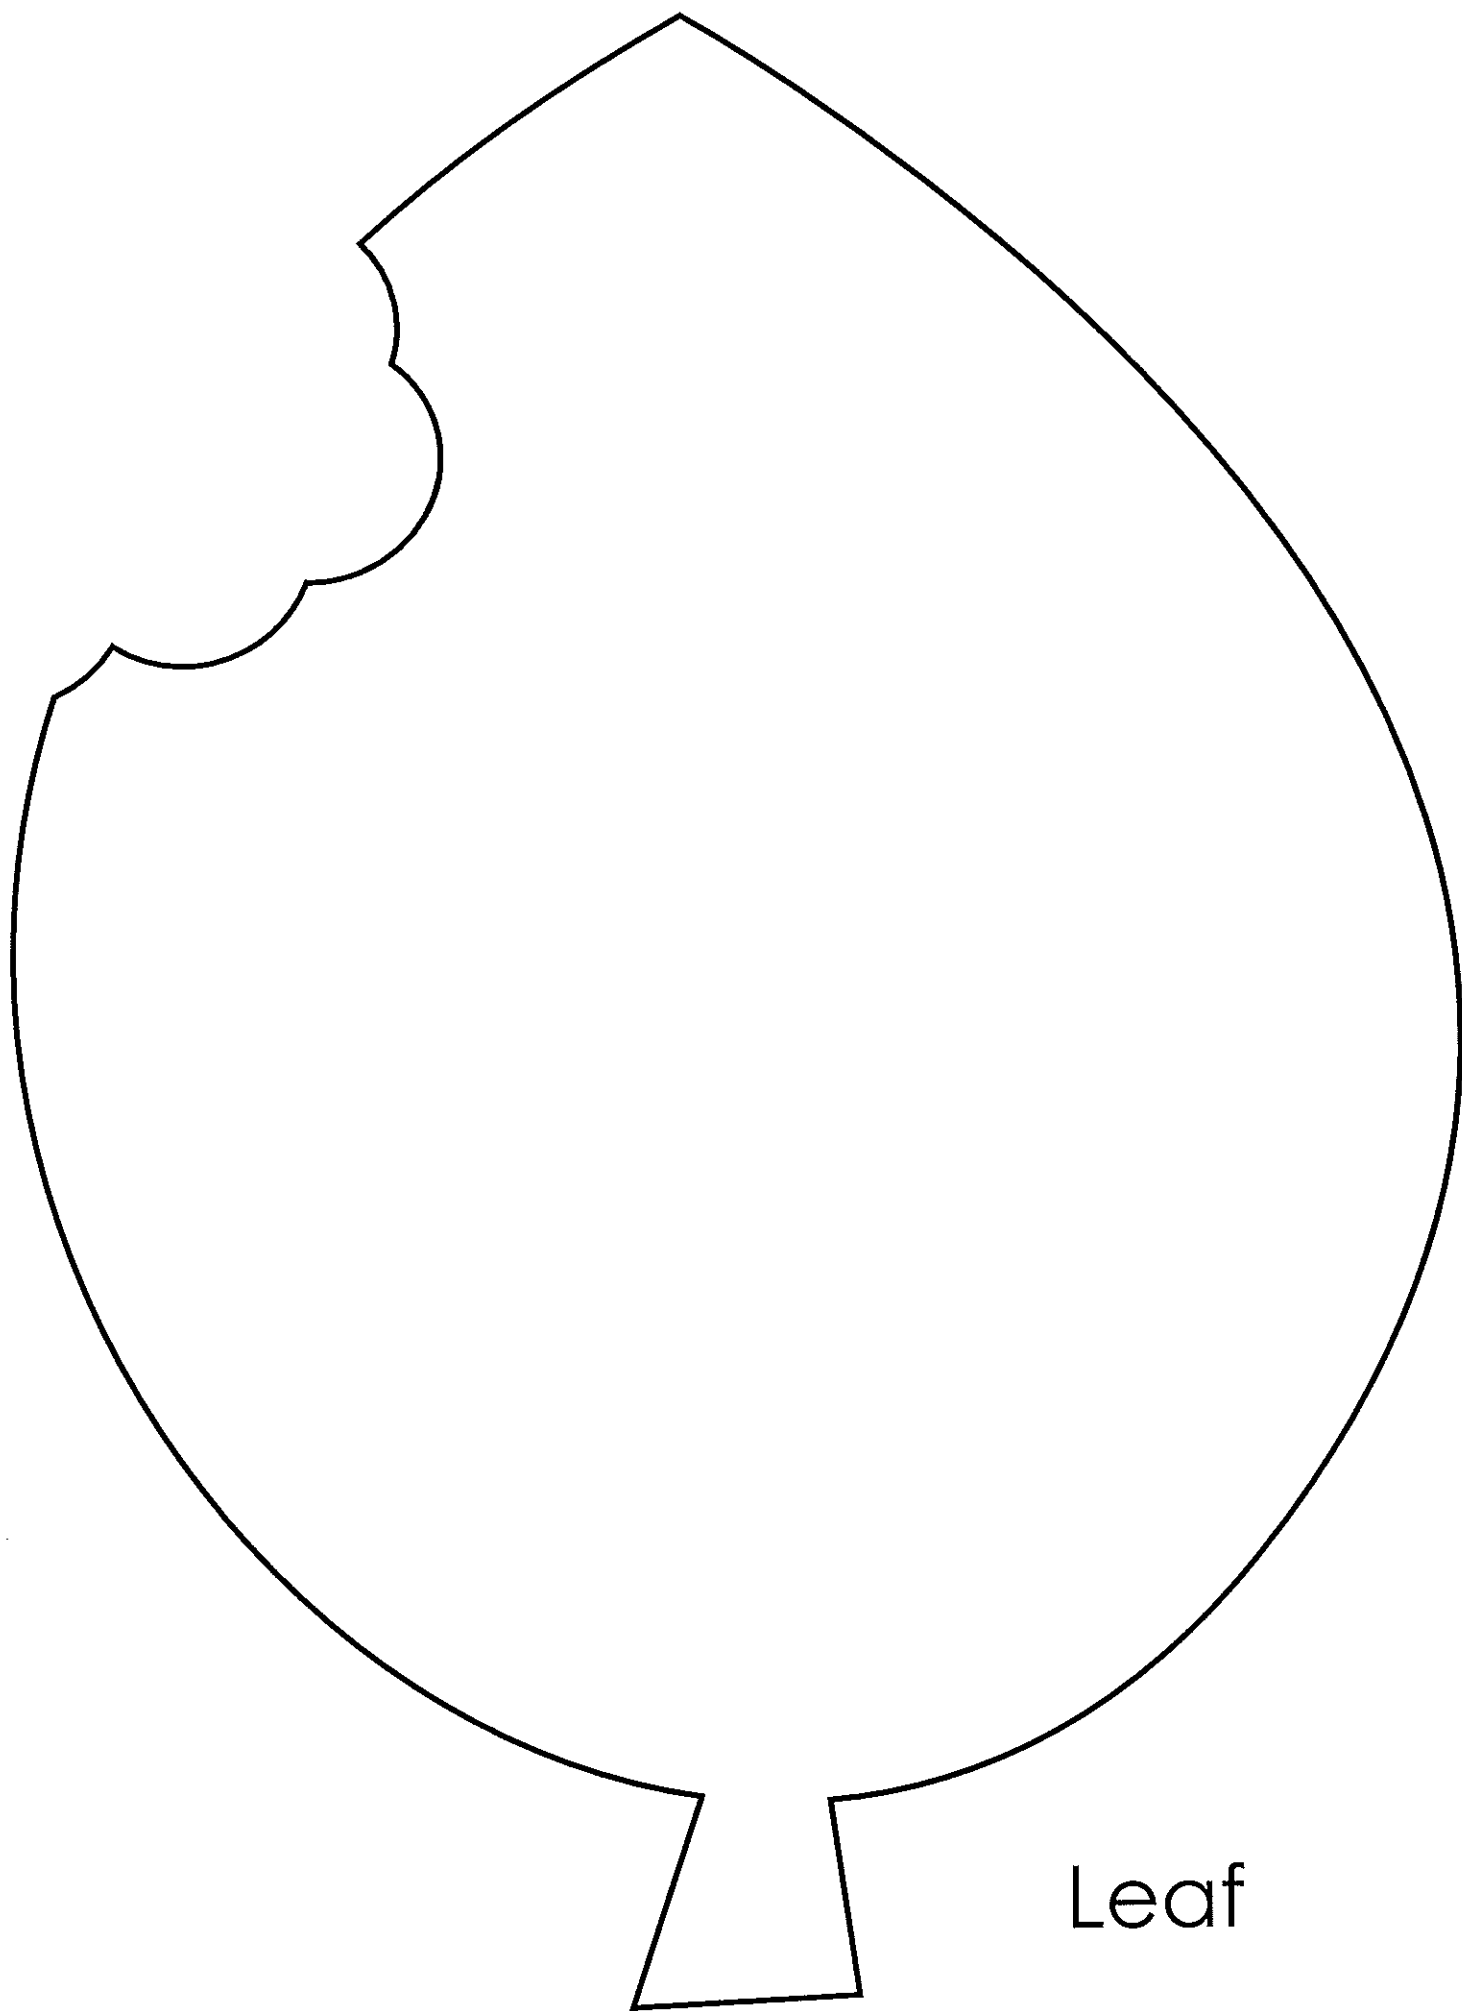

SPBA4: Spectrum Board Assorted

Craft Template:

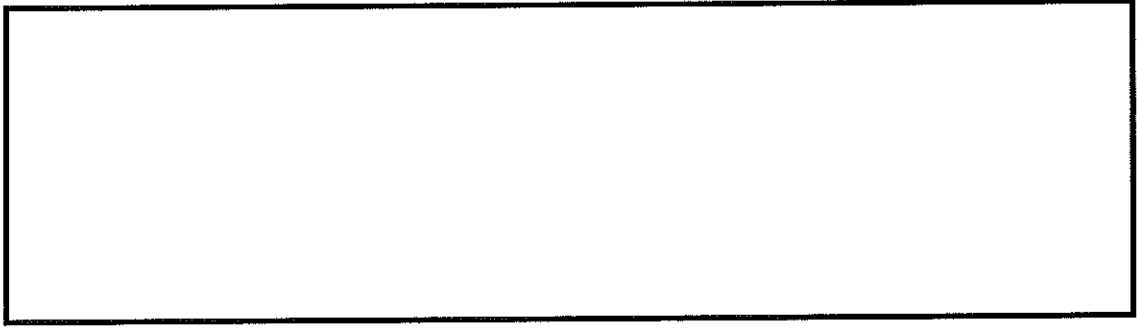

Caterpillar Templates Available @
www.austpaper.com.au/craft

INSTRUCTIONS

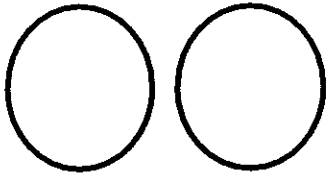

1. Choose the colours you want for your Caterpillar.
2. Cut the strips to the size you want to use, or alternatively you can follow the recommended sizes on the Craft Template available on the Austpaper website @ www.austpaper.com.au/craft
3. Make as many strips as you like then roll your coloured strips to a cylinder shape and stick together with either glue or staples.
4. Cut out and make your Caterpillars eyes, using your won shapes or the template provided. Glue your pupils to the eye ball section. Choose one of your cylinder shapes to be the head of your caterpillar and glue your eyes to it.
5. Cut and glue a couple of small strips for antennas. You can also fold the strips up before you glue then down to add a spring effect.
5. Create a base for your Caterpillar, like the leaf template provided and stick down each section of your Caterpillar.
