

tissuepaper | Autumn Tree

INSTRUCTIONS

1. Grab a few sheets of the colours you are going to use: Brown - Red - Orange - Yellow.
2. Tear a few lengths of the brown tissue off. Don't worry about being too precise, random shapes will give you a more organic look.
3. Twist your brown tissue together by rubbing your hands together with tissue between them.
4. Curl the brown tissue around itself and pull out section for branches. Glue down to your backing paper/board.
5. Tear off your colours for your leaves. Again don't worry about being precise. Different sizes and shapes will mean a better look in the end.
6. Scrunch your leaves together, play around with some lay outs before you glue them down in place.
