

Craft Project

Difficulty: **Intermediate**

Note: Some adult assistance required

spectrumboard | Bear

3

INSTRUCTIONS

1. Print the bear template on spectrum board to ensure a sturdy model. Have scissors or a scalpel ready for cutting. If you're using a scalpel, ask for help from an adult to ensure safety.
2. Cut Out the Pieces: Carefully cut out all the parts from the template, ensuring clean edges for better assembly. Cut along the dotted lines.
3. Assemble the bear: Attach the head, torso, and pelvis together to make the structure. Attach the front legs on the torso, attach the back feet on the pelvis. Fold the ends of the feet in opposite directions and paste it on the both front and back feet for support. Your 3D bear is ready! Adjust the parts to ensure symmetry, and display it proudly or use it for creative projects.

PRODUCT:

- SPBA4 Assorted

TOOLS

Scissors or a Scalpel
