

Craft Project

Difficulty: **Intermediate**

Note: Some adult assistance required

spectrumboard | Camel

INSTRUCTIONS

1. Print the camel template on spectrum board to ensure a sturdy model. Have scissors or a scalpel ready for cutting. If you're using a scalpel, ask for help from an adult to ensure safety.
2. Cut Out the Pieces: Carefully cut out all the parts from the template, ensuring clean edges for better assembly.
3. Assemble the Camel: Attach the two body pieces by pasting them together to make a thicker, more durable structure. Paste each pair of legs together to strengthen them. Cut along the dotted lines. Once the pieces are ready, slide the legs into the corresponding slots on the camel's body. Adjust them to ensure the camel stands upright and is well-balanced.
4. Your 3D camel is ready! Adjust the parts to ensure symmetry, and display it proudly or use it for creative projects.

PRODUCT:

- SPBA4 Assorted

TOOLS

- Scissors or a Scalpel
- Glue stick
- Printed template
