

# Craft Project

Difficulty: **Beginner**

**Note:** Some adult assistance required

## doyleys | Buntings

### INSTRUCTIONS

1. Collect all necessary materials for this project, including doyleys, string, and adhesive.
2. Take a doyley and fold it in half to create a semicircle. This will serve as a guide for alignment.
3. Open the doyley back to its full circular shape after making the fold.
4. Position the string along the center line of the doyley, using the crease as a guide. Secure the string in place with double-sided tape or glue. This will also hold the doyley when it is folded back in half.
5. Fold the doyley back in half over the string, ensuring the string is enclosed and the doyley maintains its shape.
6. Repeat process and add more doyleys to have a longer bunting.

#### TOOLS

Yarn / String  
Double-sided tape

#### PRODUCT:

- BWD240 - Doyleys 240mm
