TOOLS

Scissors
Glue
Rainbow Paper or Board to stick Ladybug on.

PRODUCT:

- FCI 20 - Gloss Kinder Circles
120mm 100 Sheets

CRAFT TEMPLATE:

Not Required

INSTRUCTIONS

1. Paste one black gloss circle in the middle of your page.
2. Cut a section of another black circle as large as you want. Make sure you keep round area of the circle as this section will for the Ladybugs head. Keep the left over black circle as we will need later.
3. Cut a red gloss circle in half to form the wings. Don't about being to precise, different cuts will give each wing its own character. Glue your wings in place .
4. Using the rest of the black gloss circle we used for the Ladybugs head; cut out some antennae and dots for the wings. Again don't worry about being to precise, each different cut makes your lady bug unique. Also choose a colour for your eyes (we have gone with yellow), cut them out also.
5. Now all you need to do is paste it all down.
