

Craft Project

Difficulty: **Beginner**

Note: Some adult assistance required

spectrumboard | Mother's Day Flower Pot

INSTRUCTIONS

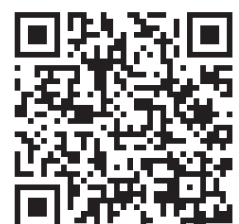

1. Choose your Spectrum Board colours. Print the template and cut out all the shapes using scissors. Take care with smaller details.
2. Fold the flower pot shape so the top and bottom ends meet. Punch holes in the top corners of the pot.
3. Glue the message card in the centre of the flower pot.
4. To build each tulip, fold two petals in half vertically, and leave the third petal unfolded—this will form the base of the tulip.
5. Glue the folded petals onto the left and right sides of the flat petal to create a 3D flower.
6. Cut 3 rectangles from green Spectrum Board for the stems. Roll each one and secure with tape.
7. Attach each tulip to a stem using glue.
8. Insert the flowers into the pot and tape them from the back to hold in place.
9. Thread a string through the holes you made in Step 2.
10. Tie the string into a bow and gift your handmade flower pot to Mum!

PRODUCT:

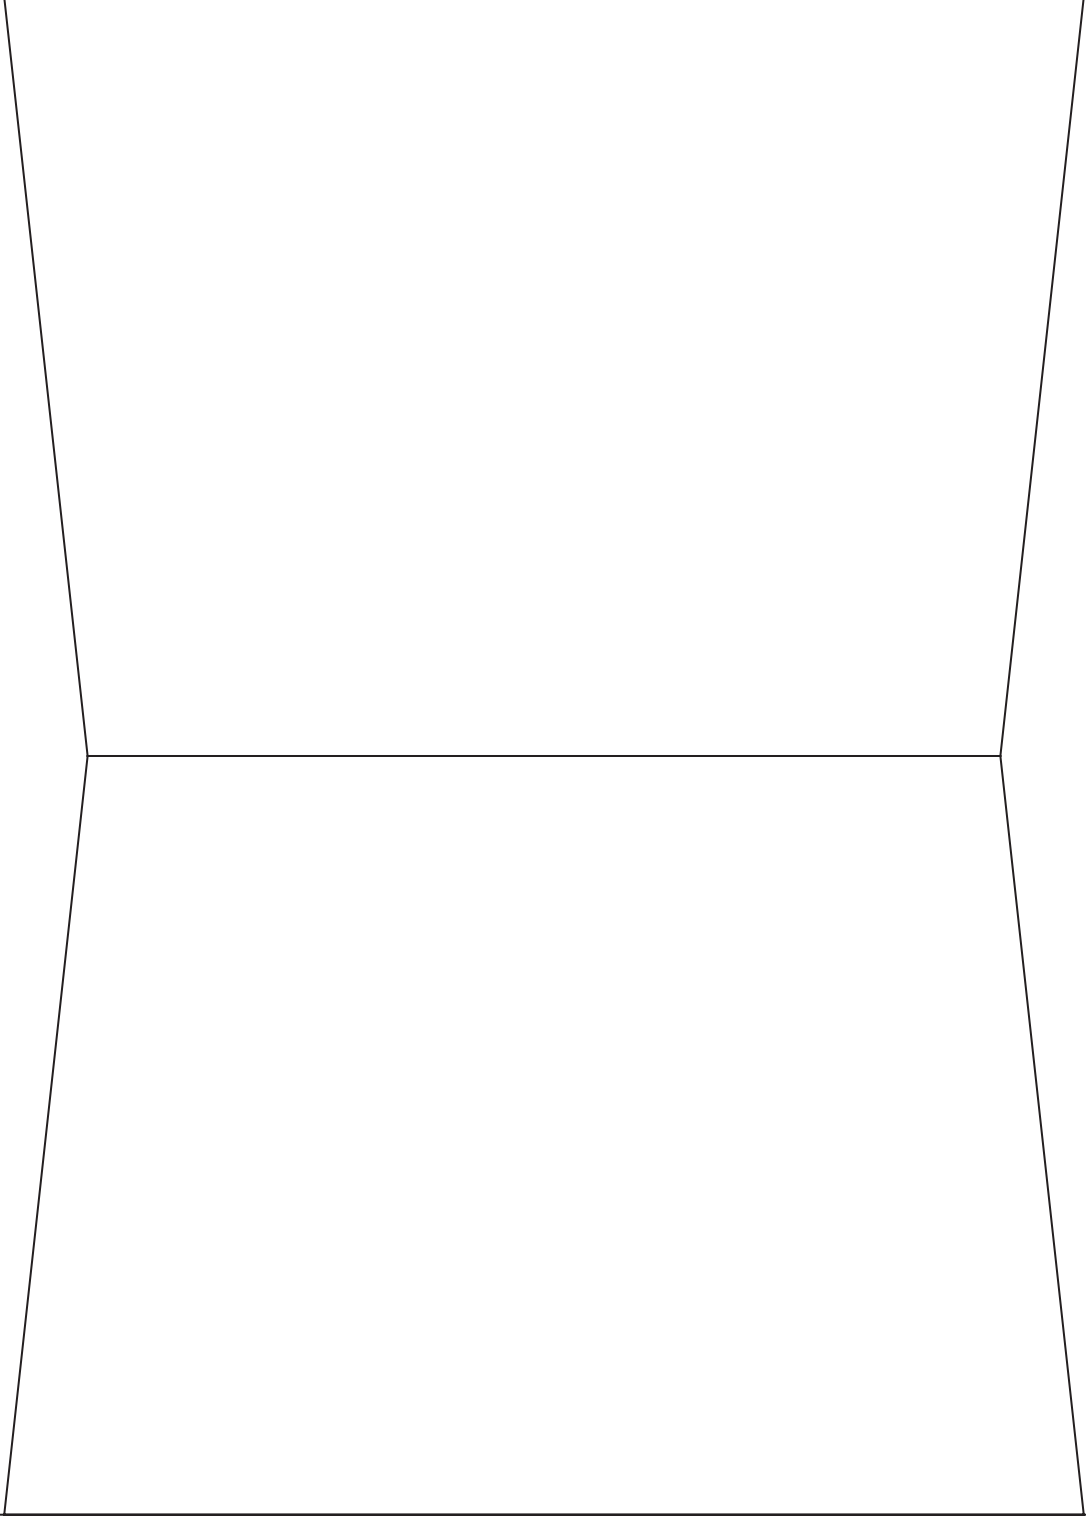

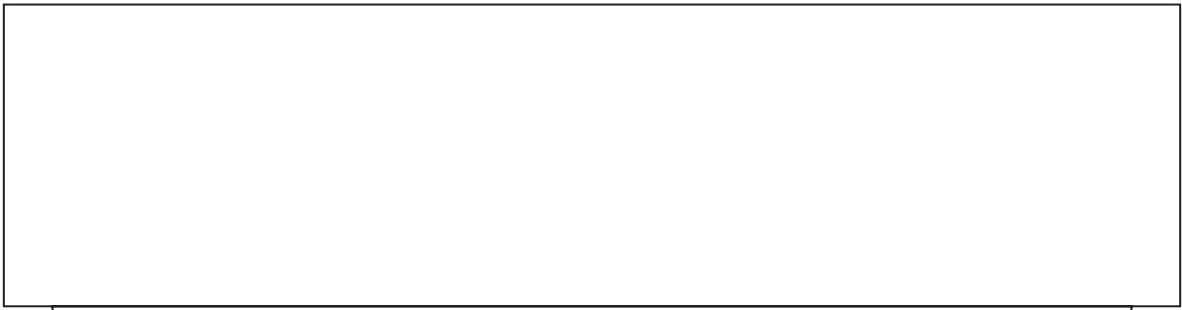

- SPBA4BA Spectrum Board 220gsm A4 100 Sheets

TOOLS

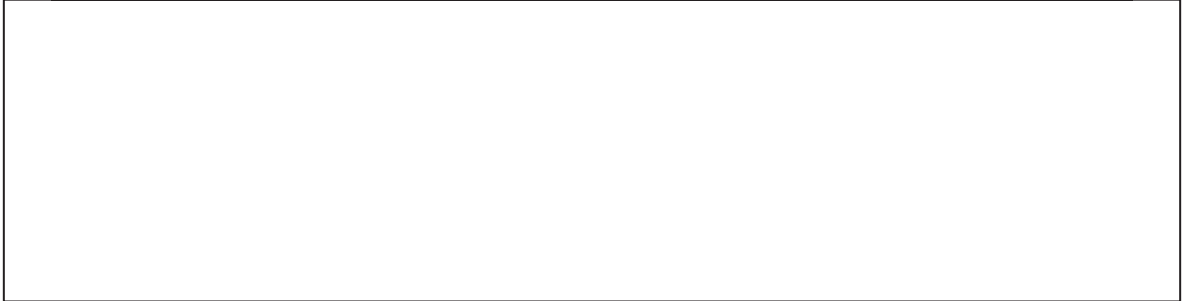

- Scissors, glue or double-sided tape
