

## kindershapes | Paper Crane

1/2

### INSTRUCTIONS

1. Make two half folds in the paper square. One vertically and one horizontally. Unfold the paper square.
2. Flip the paper square over and make two diagonal folds, corner point to corner point to make a pyramid shape. Do one fold at a time as you need to unfold the paper back to a square (diamond) before you can do your second corner point to corner point fold.
3. Unfold the paper back to a square and flip the paper square back over and fold the points (shown in yellow) to the bottom point (shown in orange). You will need to tuck in the middle crease as you fold.
4. Fold the two outside flaps to the middle crease. Flip the paper over and again fold outside flaps to the middle crease.
5. Open up all 4 flaps so you have a square (diamond) sheet of paper.

## INSTRUCTIONS

6. Fold the top flap down and make it level with the sides.
7. Flip the paper over and repeat step 6. Fold the top flaps back out as this step is just to make new crease marks.
8. Open side flaps, take the bottom point and fold upwards until you get a diamond shape. Turn paper over and repeat.
9. Reverse fold both legs. Tuck legs under new crease fold.
10. Reverse fold one section of the top point at a time. Fold down into new crease point.
11. Fold down the wings on both sides.
12. Display your finished crane.
